### **AMENDMENTS TO THE CLAIMS**

Pursuant to 37 C.F.R. § 1.121 the following listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A garment comprising a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body, wherein:

the garment in part has a portion with a strong straining force;

the portion with a strong straining force is a first strong straining portion;

wearer's right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> <del>corresponding</del> to any region from os sacrum to vertebrae lumbalis of the wearer's body; and

the first portion is adapted to cover a region extending from said position through the furthest dorsal point apex of bulge of each buttock in the direction of muscle fibers of musculus gluteus maximus to at least the vicinity of trochanter major at wearer's right and left.

2. (Currently Amended): The garment according to claim 1, further comprising a second strong straining portion, wherein:

right and left parts of the second portion are connected at a position on the garment adapted to correspond eorresponding to musculus rectus abdominis in a hypogastric region; and

the second portion is adapted to cover a region extending obliquely downward from the position on musculus rectus abdominis in a hypogastric region approximately in the direction of muscle fibers of musculus obliquus internus abdominis at wearer's right and left to at least the vicinity of trochanter major.

Claims 3-6 (Cancelled).

plication No. 10/088,719 Docket No.: 09643/000L339-US0

## 7. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body; a first strong straining portion with a strong straining force, wherein wearer's right and left parts of the first portion are connected at a position on the back side of the garment and adapted to correspond corresponding to any region from os sacrum to vertebrae lumbalis of the wearer's body;

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

a second strong straining portion; and

a third strong straining portion adapted to press the abdomen;

wherein the third portion has a main stretch direction in the longitudinal direction of the garment;

the third portion being adapted to cover the center of hypograstric region;

an end of the second portion is connected to each of the right and left lower sides of the third portion; and

the second portion being adapted to cover a region extending obliquely downward from the right and left lower sides of the third portion approximately in the directions of muscle fibers of musculus obliquus internus abdonimis at wearer's right and left to at least the vicinity of trochanter major.

### 8. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body; a first strong straining portion with a strong straining force,

Application No. 10/088,719
Amendment dated January 9, 2006
After First Office Action of Novem

After Final Office Action of November 15, 2005

wherein right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> <del>corresponding</del> to any region from os sacrum to vertebrae lumbalis of the wearer's body;

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

a third strong straining portion adapted to press the abdomen; and

a fourth strong straining portion,

wherein the third portion has a main stretch direction in the longitudinal direction of the garment;

the third portion is adapted to cover the center of a hypogastric region;

an end of the fourth portion is connected to each of right and left upper sides of the third portion; and

the fourth portion is adapted to cover a region extending obliquely upward from the right and left upper sides of the third portion approximately in the direction of muscle fibers of musculus obliquus externus abdominis at wearer's right and left to at least a position exceeding the sides of the wearer to the back side.

# 9. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body;

a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> <del>corresponding</del> to any region from os sacrum to vertebrae lumbalis of the wearer's body;

Application No. 10/088,719 Docket No.: 09643/000L339-US0

Amendment dated January 9, 2006

After Final Office Action of November 15, 2005

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of

musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

a second strong straining portion;

a third strong straining portion is adapted to press the abdomen, and

a fourth strong straining potion,

wherein the third portion has a main stretch direction in the longitudinal direction of

the garment;

the third portion is adapted to cover the center of a hypogastric region;

an end of the second portion is connected to each of right and left lower sides of the

third portion;

the second portion potion is adapted to cover a region extending obliquely downward

from the right and left lower sides of the third portion approximately in the direction of muscle

fibers of musculus obliquus internus abdominis at wearer's right and left to at least the vicinity of

trochanter trochangter major;

an end of the fourth portion is connected to each of right and left upper sides of the

third portion; and

the fourth portion is adapted to cover a region extending obliquely upward from the

right and left upper sides of the third portion approximately in the direction of muscle fibers figers

of musculus obliquus externus abdominis at wearer's right and left to at least a position exceeding

the sides of the wearer to the back side.

Claims 10-12 (Cancelled).

13. (Previously Presented): The garment according to claim 1, wherein:

the second portion also has a fifth strong straining portion; and

Application No. 10/088,719 Amendment dated January 9, 2006 After Final Office Action of November 15, 2005

the fifth portion is adapted to cover further a region extending from the vicinity of trochanter major through a lower part of the bulges of the buttocks.

14. (Currently Amended): The garment according to claim 1, wherein:

the second portion also has a sixth strong straining portion; and
the sixth portion is adapted to cover further a region extending from the vicinity of
trochanter trochanger major through at least a part of hamstrings in regio femoralis posterior.

Claims 15-24 (Cancelled).

### 25. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body; a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> corresponding to any region from os sacrum to vertebrae lumbalis of the wearer's body;

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major; and

a fourth strong straining portion,

wherein right and left parts of the fourth portion are connected at a position on the garment <u>adapted to correspond</u> <del>corresponding</del> to musculus rectus abdominis in a hypogastric region; and

the fourth portion is adapted to cover a region extending obliquely upward from the position on musculus rectus abdominis in hypograstric region approximately in the direction of

muscle fibers of musculus obloquies externus adominis at wearer's right and left to at least a position exceeding the sides of the wearer to the back side.

26. (Currently Amended): The garment according to claim 2, further comprising: a fourth strong straining portion,

wherein right and left parts of the fourth portion are connected at a position on the garment <u>adapted to correspond</u> <del>corresponding</del> to musculus rectus abdominis in a hypogastric region; and

the fourth portion is adapted to cover a region extending obliquely upward from the position on musculus rectus abdominis in a hypogastric region approximately in the direction of muscle fibers of musculus obloquies externus abdominis at wearer's right and left to at least a position exceeding the sides of the wearer to the back side.

# 27. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body; a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> <del>corresponding</del> to any region from os sacrum to vertebrae lumbalis of the wearer's body;

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major; and

a seventh strong straining portion,

wherein right and left parts of the seventh portion are connected approximately in the vicinity of a position on the garment adapted to correspond corresponding to the back center of the waist; and

the seventh portion is adapted to cover a region extending from the vicinity of the position at the back center of the waist through musculus latisimus dorsi and musculus gluteus medius at wearer's right and left and a part of musculus obloquies externus abdominis to at least a position exceeding the sides of the wearer to the front side.

28. (Currently Amended): The garment according to claim 26, further comprising:

a seventh strong straining portion,

wherein right and left parts of the seventh portion are connected approximately in the vicinity of a position on the garment <u>adapted to correspond</u> <del>corresponding</del> to the back center of the waist; and

the seventh portion is adapted to cover a region extending from the vicinity of the position at the back center of the waist through musculus latisimus dorsi and musculus gluteus medius at wearer's right and left and a part of musculus obloquies externus abdominis to at least a position exceeding the sides of the wearer to the front side.

#### 29. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body; a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back side of the garment <u>adapted to correspond</u> <del>corresponding</del> to any region from os sacrum to vertebrae lumbalis of the wearer's body; and

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

the first portion also has an eighth strong straining portion,

Application No. 10/088,719
Amendment dated January 9, 2006

After Final Office Action of November 15, 2005

wherein the eighth portion is adapted to cover further a region extending from the

Docket No.: 09643/000L339-US0

vicinity of trochanter major toward regio femoralis anterior medialis through at least a part of any at

least one musculus quadriceps femoris selected from musculus sartorius, musculus rectus femoris

and musculus vastus medialis.

30. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower

body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body;

a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back

side of the garment adapted to correspond corresponding to any region from os sacrum to vertebrae

lumbalis of the wearer's body; and

the first portion is adapted to cover a region extending from said position through

tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of

musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

the first portion also has a ninth strong straining portion,

wherein the ninth portion is adapted to cover further a region extending from the

vicinity of trochanter major through the vicinity of tractus iliotibialis and/or musculus vastus

lateralis in regio femoralis to a position a little higher than patella.

31. (Currently Amended): A garment comprising:

a stretch fabric wherein the garment is adapted to cover at least a part of the lower

body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body;:

a first strong straining portion with a strong straining force,

wherein right and left parts of the first portion are connected at a position on the back

side of the garment adapted to correspond corresponding to any region from os sacrum to vertebrae

lumbalis of the wearer's body; and

Application No. 10/088,719 Docket No.: 09643/000L339-US0

Amendment dated January 9, 2006 After Final Office Action of November 15, 2005

the first portion is adapted to cover a region extending from said position through tops of bulges of the buttocks or vicinities thereof approximately in the direction of muscle fibers of

musculus gluteus maximus at wearer's right and left to at least the vicinity of trochanter major;

the first portion also has an tenth strong straining portion; and

the tenth portion is adapted to cover further a region extending from the vicinity of

trochanter major through the vicinity of tractus iliotibialis and/or musculus vastus lateralis to

patella, and further from patella through the vicinity of musculus gastrocnemius and/or musculus

soleus in the regio cruris lateralis to the vicinity of an upper part of malleolus lateralis so as to

support musculus gastrocnemius and musculus soleus.

32. (Previously Presented): The garment according to 28, further comprising:

an eleventh strong straining portion in which the fourth portion and the seventh

portion are united and continuous.

33. (Previously Presented): The garment according to claim 1, wherein a strong straining

portion is formed by laminating a cloth on the front side or back side of a main body fabric of the

garment.

34. (Previously Presented): The garment according to claim 1, wherein a strong straining

portion is formed by changing a stitch for knitting a main body fabric of the garment to form a weak

straining portion and a strong straining portion in patterns.

35. (Previously Presented): The garment according to claim 1, wherein a strong straining

portion is formed by laminating a film of a synthetic resin or rubber having elasticity on a

predetermined part of a main body fabric of the garment or by impregnating or coating a

predetermined part of a main body fabric of the garment with a solution or emulsion of a synthetic

resin or rubber having elasticity followed by drying.

- 36. (Previously Presented): The garment according to claim 1, wherein a strong straining portion has a straining force of 150 to 400 gf.
- 37. (Previously Presented): The garment according to claim 1, wherein the stretch fabric is a knitted fabric selected from a two-way stretch tricot and a stretch raschel.
  - 38. (Previously Presented): The garment according to claim 1, wherein:

the garment comprises a stretch fabric,

the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is worn by being fitted to the wearer body, and

the garment is selected from a girdle, spats, sports tights, bodysuit, leotard and swimsuit.

39. (Previously Presented): The garment according to claim 1, wherein:

the garment comprises a stretch fabric,

the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is worn by being fitted to the wearer body, and

the garment has a leg part for cylindrically covering regio femoralis of the wearer body to at least a position lower than the crotch part.

40. (Previously Presented): The garment according to claim 1, wherein:

the garment comprises a stretch fabric,

the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is worn by being fitted to the wearer body,

the position of a lower end of the garment is approximately the same as or higher than the position of the crotch part; and

the garment does not have a leg part for cylindrically covering regio femoralis to at least a position lower than the crotch part.

41. (Currently Amended): The garment according to claim 31, further comprising a twelfth

strong straining portion, wherein:

the twelfth portion is adapted to cover a region extending from an upper part of regio femoralis medialis through musculus vastus medialis to patella so as to support musculus vastus medialis, and further from patella through the vicinity of one of musculus gastrocnemius and musculus soleus in regio cruris region curis medialis to the vicinity of an upper part of malleolus medialis so as to support musculus gastrocnemius and musculus soleus.

42 (Currently Amended): A garment comprising a stretch fabric wherein the garment is adapted to cover at least a part of the lower body of a wearer, has a crotch part, and is adapted to be worn by being fitted to the wearer's body, wherein:

the garment in part has a portion with a strong straining force;

the portion with a strong straining force is a first strong straining portion;

wearer's right and left parts of the first portion are connected at a position on the back side of the garment adapted to correspond corresponding to any region from os sacrum to

vertebrae lumbalis of the wearer's body; and

the first portion is adapted to cover a region starting from said position, running in the direction of the muscle fibers of musculus gluteus maximus to extend over the <u>furthest posterior</u> highest point of each buttock at right and left sides of the garment, and reaching at least the vicinity of trochanter major.
